Financial –

- ▶ Medicare Advantage–
 - ▶ Quota Share on YRT basis
 - ▶ Reinsurers capital utilized
 - ▶ Typically, reinsurer upside is limited and while downside is not
- ▶ Disabled claims block
 - ▶ 3 years +, predictable

Aetna

- ▶ U.S. health insurer **Aetna Inc.** ([AET - Analyst Report](#)) January 27, 2012 has announced a three-year reinsurance agreement with Vitality Re Limited, a newly-formed special purpose insurance company based in the Cayman Islands. Per the agreement, Aetna will get \$150 million of catastrophe bond-type cover for its subsidiary Health Re Inc. against medical benefits claims exceeding pre-determined levels.
- ▶ The agreement is a part of Aetna's long-term capital management strategy, which will release capital held with respect to its commercial group health business. It is also expected to effectively meet the risk-based capital requirements set by state regulators.
- ▶ Aetna will start receiving reimbursements from Vitality Re if its medical ratio, the percentage of premiums spent on medical costs, reaches 97%. The upper limit for the ratio has been set at 117%, implying that in case the ratio reaches the set limit, Aetna will get a full payment of \$150 million.

Developments

- ▶ Accountable Care Organizations –
 - ▶ Medicare (required starting point)
 - ▶ Commercial, Self-funding
